FACULTY.

WILLIAM E. PAYNE, M.D., Bath, Maine,
CONRAD WESSELHOEFT, M.D., 302 Columbus Avenue,
Professors of Materia Medica and Therapeutics.

J. HEBER SMITH, M.D., Melrose, Mass.,
Adjunct Professor of Materia Medica and Therapeutics.

DAVID THAYER, M.D., 58 Beach Street,
Professor of Practice of Medicine.

E. BRUNO DE GERSDORFF, M.D., 138 Boylston Street,
Professor of Pathology and Diagnosis.

HENRY B. CLARKE, M.D., New Bedford, Mass.,
Professor of Clinical Medicine.

I. TISDALE TALBOT, M.D., 31 Mt. Vernon Street,
Professor of Surgery and Surgical Pathology.

HOLMES M. JERNEGAN, M.D., 9 James Street,
Professor of Operative and Clinical Surgery.

HENRY C. ANGELL, M.D., 16 Beacon Street,
Professor of Ophthalmology.

FRANCIS H. KREBS, M.D., 42 Union Park,
Professor of Obstetrics.

JOHN H. WOODBURY, M.D., 58 Temple Street,
MARY SAFFORD BLAKE, M.D., 4 Boylston Place,
Professors of Diseases of Women.

NATHAN R. MORSE, M.D., Salem, Mass.,
MERCY B. JACKSON, M.D., 681 Tremont Street,
Professors of Diseases of Children.

WALTER WESSELHOEFT, M.D., 6 Arrow Street, Cambridge,
Professor of Anatomy.
JOSEPH R. BUCHANAN, M.D., SYRACUSE, NEW YORK,
Professor of Physiology.

N. FREDERICK MERRILL, Ph. D., CAMBRIDGE,
Professor of Chemistry.

JOHN ORDRONAUX, M.D., LL.D., NEW YORK,
Professor of Medical Jurisprudence.

ARCHIBALD K. CARRUTHERS, M.D., 232 HARRISON AVENUE,
Lecturer on Physiology.

FREDERIC W. PAYNE, M.D., 27 CONCORD SQUARE,
Lecturer on Ophthalmic Surgery.

EDWARD P. COLBY, M.D., WAKEFIELD, MASS.,
Lecturer on Pharmacology and Medical Botany.

CHARLES R. BROWN, M.D., 14 BURROUGHS PLACE,
Lecturer on Histology.

T. DWIGHT STOWE, M.D., FALL RIVER, MASS.,
Lecturer on Diagnostics.

EDWIN C. BOLLES, PH. D., SALEM,
Lecturer on Microscopy.

ALONZO BOOTHBY, M.D., 60 TEMPLE STREET,
Demonstrator.

CAROLINE E. HASTINGS, M.D., 339 SHAWMUT AVENUE,
Assistant Demonstrator and Special Lecturer on Anatomy.

I. TISDALE TALBOT, M.D., 31 MT. VERNON STREET,
Dean.

JOHN H. WOODBURY, M.D., 58 TEMPLE STREET,
Registrar.
CIRCULAR.

The twenty-sixth annual term of the New-England Female Medical College will commence in the College Building, on East Concord Street, on Wednesday, November 5, 1873, and continue sixteen weeks.

By its connection with Boston University, a much larger Faculty and greatly increased facilities for instruction are provided.

The united Schools will be open to students of both sexes, on uniform terms and conditions.

The lectures will be heard in common so far as seems appropriate in the judgment of the Faculty, and separate lectures will be given whenever it is deemed necessary and advisable.

Separate cloak and retiring rooms are provided in the college building for the use of lady students.

Satisfactory testimonials of good moral character will be required of all.

COURSE OF INSTRUCTION.

The regular course will be of the most thorough and comprehensive character, covering three years, in which time it will be the aim of the Faculty to impart to every student a complete scientific and practical medical education. The graded course, by which the various branches are taught in succession, is considered the best method for thorough instruction; it is therefore earnestly recommended to all who are to commence the study of medicine. To those who have partially completed their course elsewhere, and to those graduates in medicine who desire to acquire a knowledge of the principles and practice as taught in this School, especial attention will be given by the Faculty, and every facility rendered
for the further prosecution of their studies. The regular course of instruction will be as follows:

**FIRST YEAR.**

Anatomy, general, descriptive, and comparative, with dissections; Histology and Microscopy.

Physiology, human and comparative.

General Chemistry.

Botany.

**SECOND YEAR.**

Anatomy, pathological and surgical, with dissections and operations on the cadaver.

Medical and Pharmaceutical Chemistry.

Materia Medica.

Institutes of Medicine.

Clinical Medicine.

General Pathology.

Surgery.

Clinical Surgery.

Ophthalmology and Otology.

**THIRD YEAR.**

Materia Medica.

Institutes of Homœopathy and Practice.

Special Pathology and Diagnosis.

Clinical Medicine.

Surgery and Surgical Pathology.

Clinical Surgery.

Obstetrics.

Diseases of Women.

Diseases of Children.

Medical Jurisprudence, Ethics, and Æsthetics.

**GRADUATION.**

Candidates for the degree of Doctor of Medicine must be twenty-one years old, and of good moral character.

Such as have not pursued the full course of this school and passed its regular examinations must present evidence of hav-
ing studied medicine three years with competent instruction, and of having attended at least two full and reputable courses of lectures, the last in this school, and must pass an examination satisfactory to the Faculty. They must apply to the Dean of the Faculty four weeks before the time of graduation, and each must then present an original thesis upon some theme related to the studies of the School.

**COURSE OF LECTURES.**

The lecture term will commence on November 5th, 1873, and continue sixteen weeks, closing early in March.

All the lectures of the three years' course will be delivered during each lecture term. These will combine, as far as possible, the advantages of oral, text-book, and clinical instruction.

Students who may not wish to take the full three years' course, as recommended, can attend such courses as they may elect, or all of them, during a single session.

**FACILITIES FOR INSTRUCTION.**

The College building, in East Concord Street, is centrally and favorably located for the purposes of the School.

The public hospitals and charitable institutions of Boston and vicinity afford to the medical student unsurpassed means of clinical instruction and observation; and no effort will be spared by the Faculty to secure to the students the full benefit of these institutions.

Among these the following are under homoeopathic management:

- The Massachusetts Homœopathic Hospital,
- The Home for Little Wanderers,
- The Consumptives' Home,
- The House of the Angel Guardian,
- The College Dispensary,
- The Homœopathic Medical Dispensary.

There are, also, the United States Marine and Naval Hospitals, the City Hospital and Public Institutions, the New England Hospital for Women, and Children, the Massachusetts General Hospital, the Carney Hospital, the Eye and Era
Infirmary, and many smaller institutions in which special studies may be pursued with advantage.

**CLINICAL INSTRUCTION.**

A medical and a surgical clinic will be held weekly in the college building, under the charge of the Professors, and in these, as in other departments, special effort will be made to familiarize the students with the best methods of examining patients, and to instruct them in all the details of diagnosis, prognosis, and treatment.

Physicians are urgently requested to send to the College Clinics during the lecture session, such cases of general or special disease as possess unusual interest, or require particular skill and experience in their treatment. All operations and examinations before the class will be entirely gratuitous.

**SCHOLARSHIPS.**

A limited number of free scholarships for the benefit of indigent and worthy female students, are at the disposal of the officers of the college, and will be available to such as require assistance.

The *Homœopathic Association of Boston University* will also be able to render some assistance to worthy and indigent students.

**HOUSE PHYSICIAN TO THE MASSACHUSETTS HOMŒOPATHIC HOSPITAL.**

At the close of the lecture term, an examination will be held for this position. The successful candidate will receive board and lodging, and unusual clinical advantages in the Hospital, for one year.

**TEXT-BOOKS.**

The following are recommended by the Faculty, for study and reference:

**MATERIA MEDICA.** — Hahnemann; Jahr's Symptomen Codex; Hale's New Remedies; U. S. Dispensatory.

**INSTITUTES.** — Hahnemann's Organon; Grauvogl's Text-Book; Russell's History of Medicine.
PATHOLOGY. — Raue; Da Costa's Diagnosis.

PATHOLOGICAL ANATOMY. — Rokitansky; Thomas Post-mortem Examinations.

PRACTICE. — Hahnemann's Acute and Chronic Diseases; Laurie; Jahr's Clinical Guide; Gross' Comparative Materia Medica; Johnson's Therapeutic Key.

SURGERY. — Helmuth; Franklin; Gross; Erichsen; Hamilton on Fractures and Dislocations.

OPHTHALMOLOGY. — Angell; Wells; Stellwag; De Wecker (French).

OBSTETRICS. — Guernsey; Meigs; Cazeaux.

DISEASES OF WOMEN. — Ludlam; Thomas.

DISEASES OF CHILDREN. — Hartmann; Tanner; Vogel.

ANATOMY. — Gray; Sharpey and Quain; Heath; Hodges' Practical Dissections.

PHYSIOLOGY. — Carpenter; Dalton.

CHEMISTRY. — Fownes; Eliot and Storer; Barker.

MEDICAL JURISPRUDENCE. — Beck; Taylor.

Arrangements have been made with Otis Clapp & Son to furnish to students all the text-books used in the school at the lowest net cash prices.

The Library of the College will be open for the free use of the students.

By special arrangements, students in the University School of Medicine will have access to the Boston Public Library, which is unusually rich in medical literature.

GENERAL EXPENSES.

Students can live as cheaply in Boston as in any city of its size, and the general expenses will be determined in a great measure by the tastes and inclinations of the individual.

The cost of board and rooms need not exceed from five to eight dollars per week. By the formation of clubs, the expense of board has been reduced to less than three dollars per week in some departments of the University.

The lectures and other exercises of the school will be arranged at such hours that students living in any of the neighboring cities or towns on the lines of the various railroads may conveniently attend.

Season tickets can be obtained by students at reduced rates, the reduction being usually one-half. Inquiry regarding students' tickets should be made at the railroad offices, and not at the College.

The varied and valuable facilities for general culture which Boston affords in its libraries, its collections of natural history, its courses of scientific and literary lectures, its classical and popular concerts, and its art exhibitions, make an aggregate of general educational agencies, whose value to the earnest and ambitious student can hardly be estimated.

Its great attractiveness as a place for study, is shown in the fact that graduates of the most distant and celebrated colleges resort to it for their professional courses. The past year, thirty-four colleges have been represented by their graduates in the School of Theology and School of Law of Boston University,—a larger number than were represented in the corresponding departments of any other American University.

For any further information application should be made to the Dean,

I. TISDALE TALBOT, M. D.,
31 Mount Vernon Street, Boston.

Or to the Registrar,

JOHN H. WOODBURY, M. D.,
58 Temple Street, Boston.
