Subject: legislative drafting

Dear Ann and Bob,

I trust things are well with you. We have just been through a cold and rainy spell.

I refer to correspondence between you and Theunis Roux. We have not been able to raise funds through Ray Barrell or Pand DM. What we suggest as a fallback is that the course could run as per this year. It would be offered to Gauteng and other Government officials as well as the Sri Lankans. Our students would be encouraged to do the course and 6 points can be allocated to it rather than the 4 points it rated this year. They would pay fees to the University which we have no control over.

I suggest that non students should be charged an amount which we can determine and your stipend could be paid out of the fees paid by these non students. The fees would be deposited into a law faculty account and then we would pay you out of this account.

We really hope you would be able to come under these conditions as this year’s course was a great success. But most important we would like to have you back.

Please advise soonest,

With best wishes,

Andrew
